Advanced Structural Technologies, Inc. Federal Capabilities Statement

ABOUT

Advanced Structural Technologies, Inc. (AST) is an American manufacturer of rotary forged wheel blanks. Rotary forged wheels are the strongest and lightest wheels on the market, due to the molecular structure of the metal and better control over grain structure.

We are Tier 1/Tier 2 suppliers for military wheel blank applications.

For over 25 years, we've proudly kept all production in the USA at our Oxnard, CA factories, allowing for smaller runs, and fast delivery.

EXPERIENCE

- M1 Abrams Tank Wheels
- Wheel Components for Tactical Wheeled Vehicles such as:
 - HMMWV
 - HEMTT
 - HIMARS
 - MLRS
 - MRAP
 - RTCH
